Evolve.

The time to start AI training was yesterday.
Lets get to work.

Businesses stand to gain tremendously – if they can figure out how to train their employees quickly and equitably.

Generative AI's impact of workforce Productivity

Skilled use of Generative AI, like ChatGPT, delivers a powerful and multiplicative productivity boost equivalent to a 2-year experience enhancement for every employee. For employees new to a subject, the productivity boost exceeds 40% and even experienced employees gain a substantial productivity boost.

With specifically trained AI systems - trained using specific business goals in mind, productivity increases are far greater.

WORKFORCE TRAINING

Introduction to AI in the workplace

An introduction to Artificial intelligence: what it is, what it enables us to do, its capabilities and how it can help employees in their work and life.

- **Hone an understanding:** Grasp what is happening and why it matters
- **Make their work easier**: Learn tools and skills that allow them to do their job faster and better
- **Open doors & add value**: Enabling them to expanding the technical skills they already possess
- **Strategic awareness:** Understand how AI is changing the business world to develop pattern recognition and drive business strategy

AI Workshops

In our workshops we spend time digging into the details of employees business roles and day to day work, exploring opportunities to use AI systems available to them in specific situations.

- **Role-based case studies:** Analyzing current workflows
- **Demonstrations:** AI capabilities applied to daily tasks
- **Hands-on exercises:** With AI tools/applications relevant to job duties
- **Best practice:** For sharing across roles/departments
